PassMark - CPU Mark  
High End CPUs  
- Updated 13th of July 2017

The Core i9 CPU offers a dramatic increase in performance compared to existing i7 CPUs and challenges low and mid end Xeon systems at a very reasonable price point

As a reference the quad i7 in Apple MacBook Pro 2016 15" scores 8794 vs the Core i9's 22629
